Polička after 1744 - Baroque appearance of the town during its golden age

Entrance to the city crossig the fortification

The corner house No. 389 located in the New District.

In 1990, Polička was declared a town monument zone, and in the town monument zone, and in the same year, on the occasion of the 100th anniversary of B. Martinů's birth. Nowdays the town has some important landmarks in which we can find the townhall. the olf fortifica-tion, St. James church, the New District etc.

Polička was founded in 1265 ans it is located in the district of Svitavy in the eastern part of Bohemia , near the border with Moravia , in the basin at Bílé potok , about 17 km west of Svitavy . The historic core is a city monument zone that has sev-eral historical landmarks.

The obvious reason for the founda-tion was the strengthening of royal power in this farthest tip of eastern Bohemia.

Policka's fortification was built when the city was founded but it was made of wood until Charles IV. After the thirty years war the walls were not functional anymore but they never got demolished and the fortification has been preserved.

The sections of the walls between the towers called kurtiny reach a length of 42 to 46 m. Only on the southern side protected by the pond the distance fluctuated from 48 to 78 m.
