

VENKOV KRÁTKÝCH VZDÁLENOSTÍ

NADHLEDVÝ POHLED NA ŘEŠENÉ ÚZEMÍ OD VÝCHODU

This is a detailed landscape architectural plan presented as an aerial perspective. The plan shows a river meandering through a rural landscape. The river is depicted with a blue center line and light blue floodplains. The surrounding land is divided into various colored zones: green for agricultural fields, light green for forested areas, and yellow for open land. A network of red lines represents roads or infrastructure, with some sections highlighted in a darker red. Purple lines indicate specific planning boundaries or features. The plan includes numerous small, stylized trees and building footprints to represent the existing and proposed landscape elements. The overall layout shows a complex integration of natural features and human-made infrastructure.
