Frontiers of Architectural Research is an international journal that publishes original research papers, review articles, and case studies to promote rapid communication and exchange among scholars, architects, and engineers. This journal introduces and reviews significant and pioneering achievements in the field of architecture research. Subject areas include the primary branches of architecture, such as architectural design and theory, architectural science and technology, urban planning, landscaping architecture, existing building renovation, and architectural heritage conservation. The journal encourages studies based on a rigorous scientific approach and state-of-the-art technology. All published papers reflect original research works and basic theories, models, computing, and design in architecture. High-quality papers addressing the social aspects of architecture are also welcome. This journal is strictly peer-reviewed and accepts only original manuscripts submitted in English.

The *International Journal of Islamic Architecture* (IJA) is intended for those interested in urban design and planning, architecture, and landscape design in the historic Islamic world, encompassing the Middle East and parts of Africa and Asia, but also the more recent geographies of Islam in its global dimensions. The main emphasis is on detailed analysis of the practical, historical and theoretical aspects of architecture, with a focus on both design and its reception. The journal is also specifically interested in contemporary architecture and urban design in relation to social and cultural history, geography, politics, aesthetics, technology, and conservation. Spanning across cultures and disciplines, *IJA* seeks to analyze and explain issues related to the built environment throughout the regions covered. The cross-cultural and interdisciplinary nature of this journal will significantly contribute to the knowledge in this field.

Journal welcomes papers that use the detailed study of traditional buildings to explore the societies, cultures, and environments that shape them. Papers may focus on construction techniques and materials, historical development and design, and the social and economic contexts in which buildings were erected. Historical, ethnological, and archaeological approaches are welcomed, as are comparative studies, and papers which focus on the histories of individually significant buildings. Such papers sit alongside theoretical discussions on the concept and nature of vernacular architecture. The focus of all papers should be the vernacular buildings themselves.

VITRUVIO Journal is an international journal publishing original articles on frontier research, interdisciplinary and overlapping, in Architecture and Building Engineering covering topics on Sustainable Heritage. So that, the journal positions its scope both in the dominions of Science and Social Sciences.

Topics covered by the journal:

- Design and Technique. Innovation and research in design, processes and operation of integrated design systems and solutions that inform advances towards the sustainable development of heritage.
- Digital Cultural Heritage. Modelling the Built Environment uses technology and digital innovation to find answers to some of the big questions facing adaptations of heritage and its societies today.
- Spatial Analysis. Smart Heritage Cities and Towns, urban and rural, are informed theoretically and empirically, by GIS systems among others to raise awareness of new technologies, software and techniques that have emerged as 'web revolution'.
- Regeneration. Social sciences applied to the improvement communities and their Historical Built Environments looking for global prosperity of Heritage Sites. Health, human wellbeing and climate change.
- Energy Focus. Works in partnership with industry, government and other academic bodies, to ensure that the carried out research has a real-word impact on sustainable use of natural resources.
- Historic Buildings and Structures. Reuse, rehabilitation and maintenance. Approaches may consider energy efficiency in historical buildings, as well as materials conservation and repair, monitorisation of structures and materials decay, among others.

ARCHITECTURE AND CULTURE

ISSN / eISSN 2050-7828 / 2050-7836

Publisher ROUTLEDGE JOURNALS, TAYLOR & FRANCIS LTD, 2-4 PARK SQUARE, MILTON PARK, ABINGDON, ENGLAND, OXON, OX14 4RN

3 issues/year, English

Architecture and Culture, the international award winning, peer-reviewed journal of the Architectural Humanities Research Association, investigates the relationship between architecture and the culture that shapes and is shaped by it. Whether culture is understood extensively, as shared experience of everyday life, or in terms of the rules and habits of different disciplinary practices, *Architecture and Culture* asks how architecture participates in and engages with it – and how both culture and architecture might be reciprocally transformed. *Architecture and Culture* publishes exploratory research that is purposively imaginative, rigorously speculative, visually and verbally stimulating. From architects, artists and urban designers, film-makers, animators and poets, from historians of culture and architecture, from geographers, anthropologists and other social scientists, from thinkers and writers of all kinds, established and new, it solicits essays, critical reviews, interviews, fictional narratives in both images and words, art and building projects, and design hypotheses.

ISSN / eISSN 2050-9006

Publisher UCL PRESS, UNIV COLLEGE LONDON, GOWER ST, LONDON, ENGLAND, WC1E 6 BT

Irregular, English

Architecture_MPS is a fully peer-reviewed international open access journal that aims to address the growing interest in the social and political interpretation of the built environment, from a multidisciplinary perspective. The journal's focus lies in critical and original engagement with the built environment and explicitly welcomes interdisciplinary perspectives on this focus. The territory it seeks to explore is an overlaid terrain in which the physical, material and the environmental are critically examined through the prisms offered by other fields. The journal publishes articles from planners, architects, urban designers, sociologists, artists, urban economists and lawyers specialized in land rights, and aims to address the relationship of these disciplines with the built environment.

EN BLANCO. Revista de Arquitectura (EN BLANCO) is an international research journal, whose main objective is the scientific dissemination of the most outstanding innovations in the field of architecture designed and made of exposed concrete. The journal is organized into two sections, WORK and RESEARCH, which expands the knowledge through two different and complementary ways

- In the WORKS section (Call for Works) architectures built with exposed concrete are made known, highlighting the architectural project as a research method. It is shown from its architectural, material, technical and energetic side or even showing the values of graphic expression. The selection of works is completed through an evaluation system carried out by the Editorial Committee, which assesses the suitability of the proposals sent in by different architecture studios. Each issue has a deputy editor, who acts as an intermediary between the architectural studios and the Editorial Board.

- In the RESEARCH section (Call for Papers) Research articles and architectural reviews are published promoting a scientific debate with a level of excellence in academic research in fields of architecture and urban planning. The selection of research articles and architectural reviews is carried out through a referee system, following the standard protocols for scientific serial publications.

Cuadernos de Proyectos Arquitectónicos es una revista enfocada a la investigación, centrando su línea editorial en los discursos teóricos y prácticos que determinan los contextos académicos y profesionales en los que se inscribe la arquitectura hoy. Si la teoría y la historia han sido habitualmente las herramientas propias de la investigación académica, hoy el escenario crítico y teórico es más abierto. La transversalidad disciplinar y la complejidad de las prácticas profesionales han establecido nuevos vectores, no sólo en los contenidos sino también en los enfoques metodológicos. Y, simultáneamente, vemos reproducirse con fuerza debates que se creían agotados, introducidos de nuevo en la actualidad de un tiempo circular que edita y re-edita los contenidos, las imágenes y los textos. Teoría, historia y práctica crítica son, por tanto, los contenidos que ocupan el lugar central de esta publicación. Sin embargo, la necesaria aproximación crítica y su inclusión en un entorno cultural, social y académico amplio propician intersecciones y afinidades con otras disciplinas y métodos de investigación. Como consecuencia, la publicación recoge tanto artículos introspectivos y disciplinares como textos prospectivos.
